## PROFILE

---

Software Engineer with 8 years of development experience, with some experience with DevOps along with a keen interest in automation, DevOps practices, Machine Learning, Cybersecurity, and PC hardware. Demonstrated adaptability to learn new programming languages, practices and tools as required. Relevant projects demonstrating these are showcased in the website above.

## TECHNICAL SKILLS

---

**Web** JavaScript, Typescript, Angular (5+), HTML, CSS (SCSS/SASS), Dojo, Electron

**Testing** Jasmine, Protractor, Cypress, JUnit, Cucumber (Gherkin), Pytest

**Backend** Java, C++, C#, NestJS, SQL

**DevOps** Jenkins, TravisCI, Azure DevOps, Github Actions

**Other** Git, Docker, Keycloak, Logstash, Python, Apache Tomcat, NGINX, VS Code, PyCharm, npm, AdobeXD, OBSStudio, OpenShot Editor, Inkscape, Figma

## WORK EXPERIENCE

---

### Senior Engineer at Envitia (January 2025 – Current)

- One of the key personnel during company transition from Atlassian Stack to Azure DevOps – transferring Company repositories from Bitbucket to Azure Repositories.
- Created the pipelines which containerised services created by the project to meet the project requirements – Also created scripts which utilises the containers in order to create local development environments for developers and integration environments for testing purposes

### Software Engineer at Envitia (January 2024 – January 2025)

- Created a Proof of Concept frontend component within a few days. The team considered the PoC useful and was cleaned up and used in the project
- **Collaborating remotely within a team** consisting of members from QinetiQ and Methods Analytics to create **machine learning training environments**.  
(<https://github.com/Autonomous-Resilient-Cyber-Defence/PrimAITE> )
- **Presenting one of the machine learning training environments** as part of the **Black Hat Europe Arsenal** events ( <https://www.blackhat.com/eu-23/arsenal/schedule/index.html#yawning-titan-35706> )

## Junior Software Engineer at Envitia (August 2018 – January 2024)

- **Creating front end solutions** required by projects, using existing company software / assets, and adapting said item for use in the project or creating a new solution entirely
- **Integrated Cucumber/Gherkin** into company projects to allow for **Behaviour Driven Development**
- **Integrated Cypress** as a replacement **End to End testing** tool for Protractor, which sped up writing of tests and **improved debugging** of tests when failures occur
- **Created UI designs** which were shown to clients before development which were **useful in identifying the wants and needs of the client(s)** – **saved cost on development**

## EDUCATION

---

2015-2018

### University of Reading – BSc Computer Science (2:1 Upper Second Class Honours)

Final Year project (dissertation) is the development of an epidemic simulator system which simulates the spread of a disease across different countries. The system also includes a scenario creator which allows users to create more scenarios the simulations can be run on. **Achieved 70%** (available at: [https://github.com/Czar-Ec/ZEUS/tree/master/ZEUS\\_VS](https://github.com/Czar-Ec/ZEUS/tree/master/ZEUS_VS))

2012 – 2015:

### St. Wilfrid's School, Crawley- A Levels:

- AS: Computing (**C**), Mathematics (**D**)    A2: IT (**A**), Physics (**C**), Chemistry (**C**)

## SKILLS

---

### Communication:

- **Constantly communicates** with other team members to **prevent merge issues** / other problems caused by unexpected changes
- **Able to convey** work that is already done / needs to be done in cases of sickness – ability to effectively carry out handover actions. Praised for documentation created for critical project information

### Teamwork:

- **Capable of working individually or as part of a team** and able to integrate new team members or self into teams
- **Able to use version control (Git)** to be able to work in coordination with other developers

### Other skills:

- **Bilingual**; can speak **both English and Tagalog**. (English as primary language)

## HOBBIES AND INTERESTS

---

### Portfolio Website

Website referenced in the title. Acts as a skill demonstrator and is used as a testing platform for new tools or frameworks.

### Miniature Painting

Painting miniatures as a form of relaxation, although, I have entered some local painting competitions.

### PC Building

During the 2020 lockdowns, I dedicated time to researching computer components. This led to me building my first PC and since then, have built 2 more.

### Kickboxing

Took on kickboxing as a physical activity and to learn some self-defence
